URBAN AND RURAL POPULATION

Final population counts of the 1966 Census are presented in this report distributed according to urban and rural. The urban is further classified by size of locality and the rural by farm and non-farm residence. These distributions are shown for provinces by sex in Table 1 and for counties and census divisions in Table 2. The statement below provides comparative totals from the 1961 Census for Canada.

More detailed classifications of the urban and rural population by such characteristics as age groups, sex and marital status will be issued at later dates as part of the regular volume series of final reports of the 1966 Census. The purpose of this advance report is to make available summary totals at the earliest possible date.

The classification "urban" includes the population living in cities, towns, and villages of 1,000 and over, whether incorporated or not. It includes also the urbanized fringes of these centres in all cases where the population of the city or town together with its urbanized fringe amounts to 10,000 or more. The remainder of the population living outside of these urban centres and suburban fringes is classed as "rural".

A "farm" for census purposes is defined as an agricultural holding of one or more acres with sales of agricultural products of \$50 or more in the previous year. All persons living on such holdings in rural areas are classed as "rural farm" regardless of their occupation. Thus, the population living on "farms" would include some persons not connected with farming operations and who derive their income from non-agricultural pursuits. Conversely, it would exclude those farm operators and their families who do not live on their holdings (e.g., in a neighbouring town or village).

Population by sex, for urban size groups, rural non-farm and rural farm, Canada, 1966 and 1961

Population selon le sexe, régions urbaines par tranche de taille, régions rurales non agricoles et agricoles, Canada, 1966 et 1961
